

J&E Hall S31203FQA20B11

Specifications

Brand	J&E Hall
Type	S31203FQA20B11
Refrigerant	Freon
kW at +10°C/+40°C	198,3
kW at 0°C/+40°C	134,7
kW at -5°C/+40°C	109,2
kW at -10°C/+40°C	84,4
m3 / h	213
Remarks	43/52 kW 50/60 Hz 2 pole motor
Weight in kg.	569 kg
Sizes	1450x700x720 mm (LxWxH)
Stock	2

Description

Used J&E Hall S31203FQA20B11

Used J&E Hall S31203FQA20B11 semi-hermetic screw compressor. Equipped with capacity controls. Functions at 50 Hz and 60 Hz by means of a 2-pole electric motor system.

*Why should one choose for HOSBV? We're not only the largest used refrigeration specialist in Europe, but also, we solely deliver our orders after performing an extensive test and an industrial cleansing. If requested we can arrange your logistics.

Compressor Type		Operating Condition		Compressor Cooling		Compressor Capacity																																																																																	
Air conditioning semi hermetic		Suction [°C]	-10.00	External oil cooling		Inverter drive																																																																																	
Volume Ratio 3		Delivery [°C]	40.00	Temperature of injection of the oil [°C]		Frequency [Hz]																																																																																	
Refrigerant R407C		Suction Superheat		Liquid injection cooling		Frequency [Hz]																																																																																	
Unit of Measure SI (kW, C)		Total [K]	5.00	Controlled del. Temperature [°C]		Speed [rpm]																																																																																	
		Useful [K]	5.00	Economiser options		Speed [rpm]																																																																																	
		Liquid Subcooling		Both		Part Load [%]																																																																																	
		Total [K]	5.00	Economised		Capacity [kW]																																																																																	
				Not Economised																																																																																			
				Temp. Diff. [K]																																																																																			
				Superheat [K]																																																																																			
				5.00
