This evaporator has a defrosting hood, while defrosting the heat stays inside the cooler and shortens the defrosting time. 1 Fan 50 Hz - 0,84/0,54 kW - 1340/940 RPM - diameter 500 mm. Complete with fan heater, this prevents ice build-up between the fan impeller and bellmouth during the defrost cycle. *All components of this used evaporator will be tested on good working, leak free condition (electro engines), coils, bearings) Choosing HOSBV means buying with warranty. We perform a industrial cleaning. Also, we can arrange your shipment.
