

# Güntner GFH 090.2B/2x5-M(D)-G6/2P

## Specifications

|                                        |                                                                                          |
|----------------------------------------|------------------------------------------------------------------------------------------|
| Marka                                  | Güntner                                                                                  |
| Typ                                    | GFH<br>090.2B/2x5-M(D)-G6/2P                                                             |
| Typ produktu                           | Drycooler                                                                                |
| Ogólna wydajność w kW                  | 906,0*                                                                                   |
| Liczba wentylatorów                    | 10                                                                                       |
| Prdkość obrotów wentylatora (obr/min)  | 770/550                                                                                  |
| Czynnik chłodzący                      | Glycol                                                                                   |
| Przepływ powietrza w m <sup>3</sup> /h | 238.000                                                                                  |
| wentylatory o średnicy Ø 900 mm        |                                                                                          |
| Powierzchnia (m2)                      | 2.888 m <sup>2</sup>                                                                     |
| Objętość rurki                         | 565 dm <sup>3</sup>                                                                      |
| Rozmiary                               | 12200x2300x1600 mm<br>(LxWxH)                                                            |
| Waga                                   | 2698 kg                                                                                  |
| Uwagi                                  | *Capacity based on 34% ethyleenglycol at 40/35°C and a ambient temperature of 25°C       |
| Remarks                                | Capacity for 34% ethyleenglycol at 60/50°C and a ambient temperature of 30°C:<br>1289 kW |

ethyleenglycol at  
90/70°C and a ambient  
temperature of 30°C:  
2597 kW

Capacity for 34%

## Description

### Used Güntner GFH 090.2B/2x5-M(D)-G6/2P

Used Güntner GFH  
090.2B/2x5-M(D)-G6/2P drycooler.  
Complete with 10 Güntner VT01182  
fans - 50 Hz - 1,8/0,66 kW - 770/550  
RPM - diameter 910 mm and a total  
airflow of 238.000 m<sup>3</sup>/h.  
\*All components of this used  
condensors will be tested on good  
working, leak free condition (electro  
engines), condensing block, bearings.  
Choosing HOSBV means buying with  
warranty. We perform a industrial  
cleaning and rust spots will be covered.  
Also, we can arrange your shipment.
